IOL Cutting Scissors

Constant quality

HASA Optix offers a quality equivalent to reusable devices allowing surgeons to use them constantly.

Cost controlling

We are offering integrated solutions to allow the circulation of a fixed cost per surgical act.

Environmentally friendly

Instrument sets are presented in a paper pouch avoiding heavy plastic inserts (only one pack and one sterilization).

Simplify

Reduce number of SKU's which contributes to a better work environment for all stakeholders.

Tailor-made

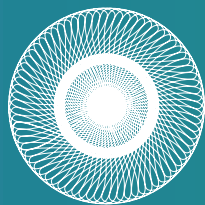

Build your own instrument set from a portfolio of more than 600 instruments which allows surgeons to prepare ahead of time for success.

Circular economy

We are building a recycling program to give a second life to the stainless steel our instruments are made of.

*** Want to change the composition of your kit? Build your own set from HASA's broad range of instruments.**

HASA OPTIX
Belgium

Anticipation, simplification and professionalisation are our drives. Join our community to simplify ophthalmic surgery.
